

Welcome to Virtually Staging PropertiesSM. We are pleased that you have chosen our unique and exciting virtual staging service to help your vacant property stand out among the competition on the Internet, generate buyer traffic and get SOLD!

Please read the following instructions and provide the required information on page 2. Orders can't be entered into our work process until both the completed order form and the photos are received.

Photograph Recommendations:

In an effort to maintain authenticity, accuracy and consistency, <u>we do not edit or alter the photos</u> (or the subject property) you <u>provide to us in any way</u>. Additionally, it is important to note that the ultimate quality of the Virtually Staging Properties SM finished product is significantly impacted by the quality of the photos originally provided.

The following are a few recommendations regarding the photos to be 'staged':

- 1. Avoid under/over-exposure by taking photos in proper light levels. Avoid having bright windows and light fixtures near the center of the photo. Try to avoid using flash. Natural or ambient light is generally more desirable.
- 2. Wide angle photos can be difficult to make look realistic. Further, photos that exhibit significant effects of a wide angle lens often result in a lower degree of realism in the finished product due to the distorted proportions of the room photographed. Additionally, those photos that exhibit extreme wide-angle lens effects (fish-eye) will not work with the Virtually Staging Properties SM Service.
- 3. While we can work with most any photo resolution, we strongly recommended that all images should be a minimum of 150 dpi resolution with a physical size of at least 4"x 6". A higher resolution photo will offer you more flexibility in the end use of the staged photo (web, print, etc.).
- 4. For best possible results, the camera should be positioned between 4 and 5 feet above the ground when photos are taken. Consider where furniture will likely be placed and do not shoot from those positions if possible.
- 5. We prefer JPEG, TIFF or EPS file formats. Pictures in the organic format of a standard retail digital camera are also generally acceptable.

Photo Upload Instructions (photos sent via e-mail can't be accepted):

To send us your photos, please follow the instructions below:

- 1. Open your Web browser and delete the contents of the Address field at the top of the browser.
- 2. Enter the following into the Address field (or click the link below if it appears): http://dropbox.yousendit.com/VSP
- 3. Please enter your last name followed by the property address (ie: Bell 123 Main Street) in the subject line.
- 4. Provide any additional info you like in the Message Box.
- 5. Attach your photos to upload (up to 5 per message) by clicking "Add another file" just above the send button. Once all of your photos have been attached, just press the "Send It" button. If you want to send more than 5 photos, just repeat this step.
- 6. Please complete and fax pages 2 to us at the fax number below to complete the order process.

Our average turn-around time is 3-4 <u>business</u> days (please note this is just an <u>average</u>); actual turn-around time can be longer or shorter depending upon our backlog at the time your complete order is received. Upon completion of your photos, you will receive an e-mail to the address you provide on page 2 that will contain a link to the 'staged' photographs. Thank you for your order and we appreciate your business!!
